

# NORTH SPLIT

#### **VISION STATEMENT**

Rather than make a ±\$250 million investment that will lock in place and exacerbate the current dysfunctional system for at least 5 more decades...

Let's pursue an opportunity to dramatically improve I-65/70 functionality, community connectivity, economic development, and private investment and create a stunning new northside front door to Indianapolis

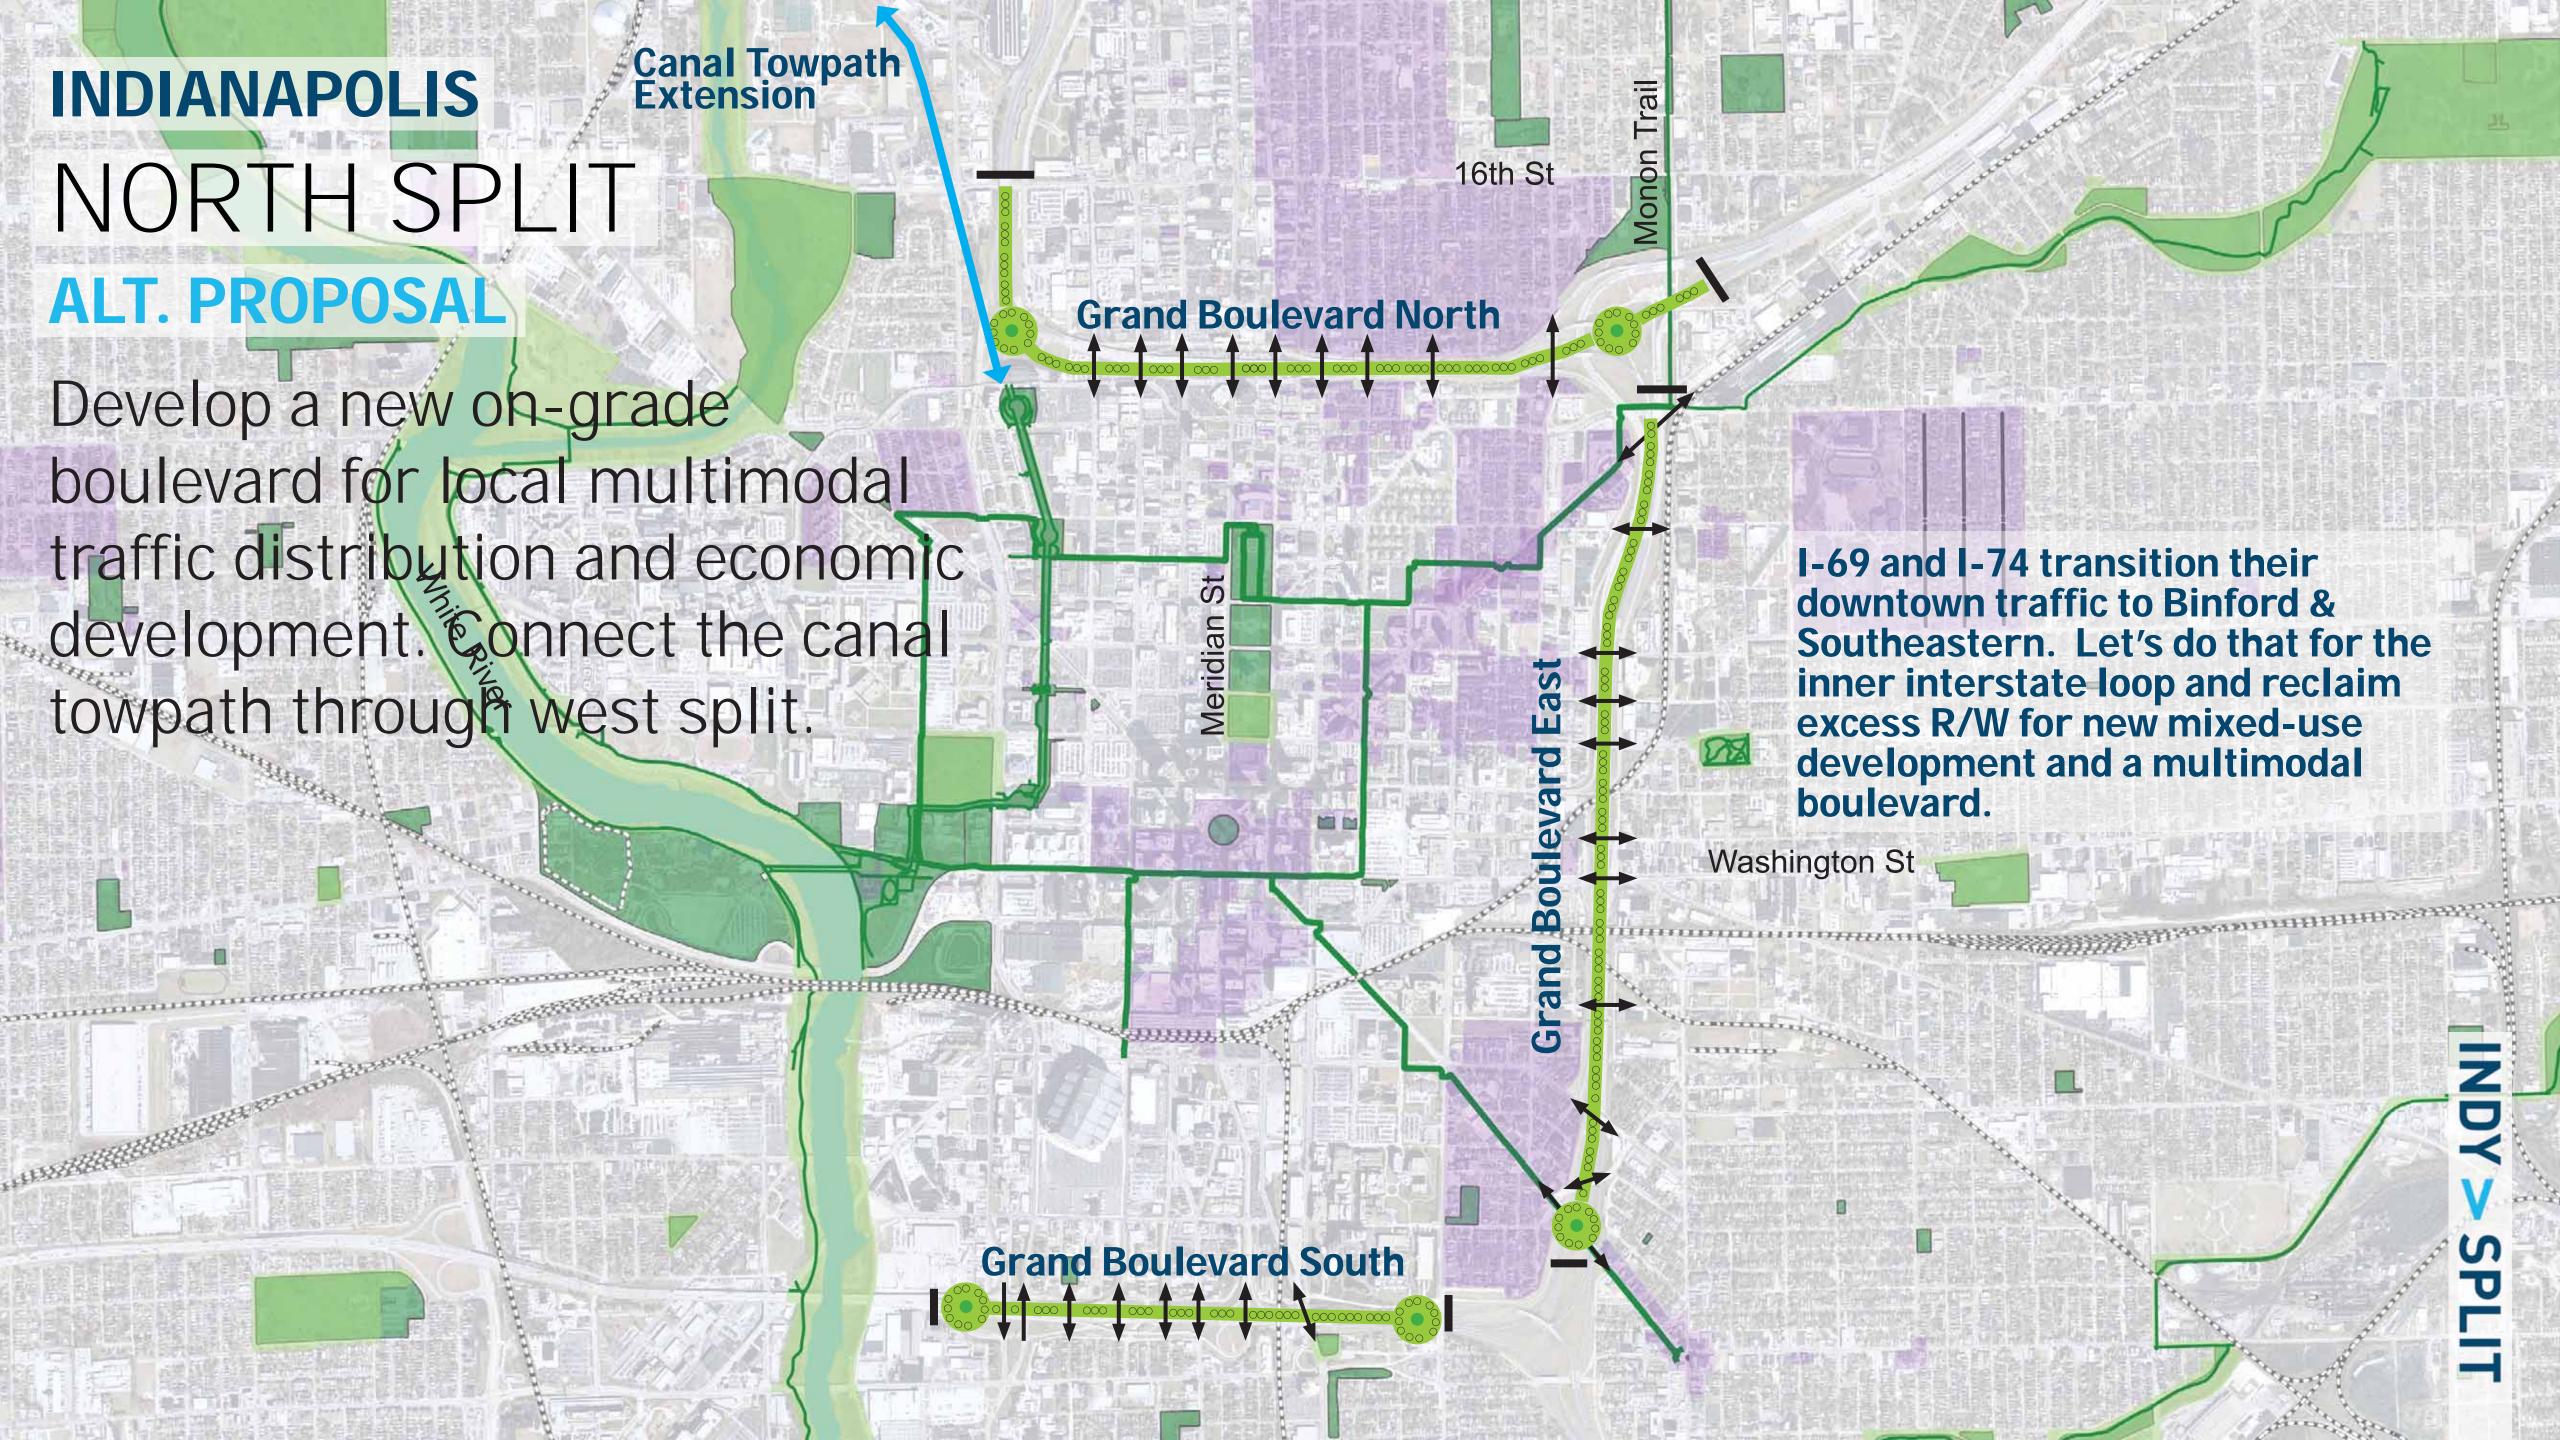

Let's leverage this investment to realize a vision supportive of the region's long-range transportation plan and economic development goals...

## NORTH SPLIT

#### **OUR INDOT REQUEST**

Request study of the following alternatives:

- 1. Through-Traffic on I-465 Outer Loop/ replace downtown interstate sections with On Grade Multimodal Boulevard
- 2. Through-Traffic in a Tunnel/ replace downtown interstate sections with On-Grade Multimodal Boulevard

## ALT. PROPOSAL 1: Through-Traffic on I-465 Outer Loop

- N/S Travel Time same at 23 min
- Consider "smart" tolling to incentivize use of I-465

- I-465 E/W Travel Time 2 min variation Inner loop=22 min / Outer loop=24 min
- Consider "smart" tolling

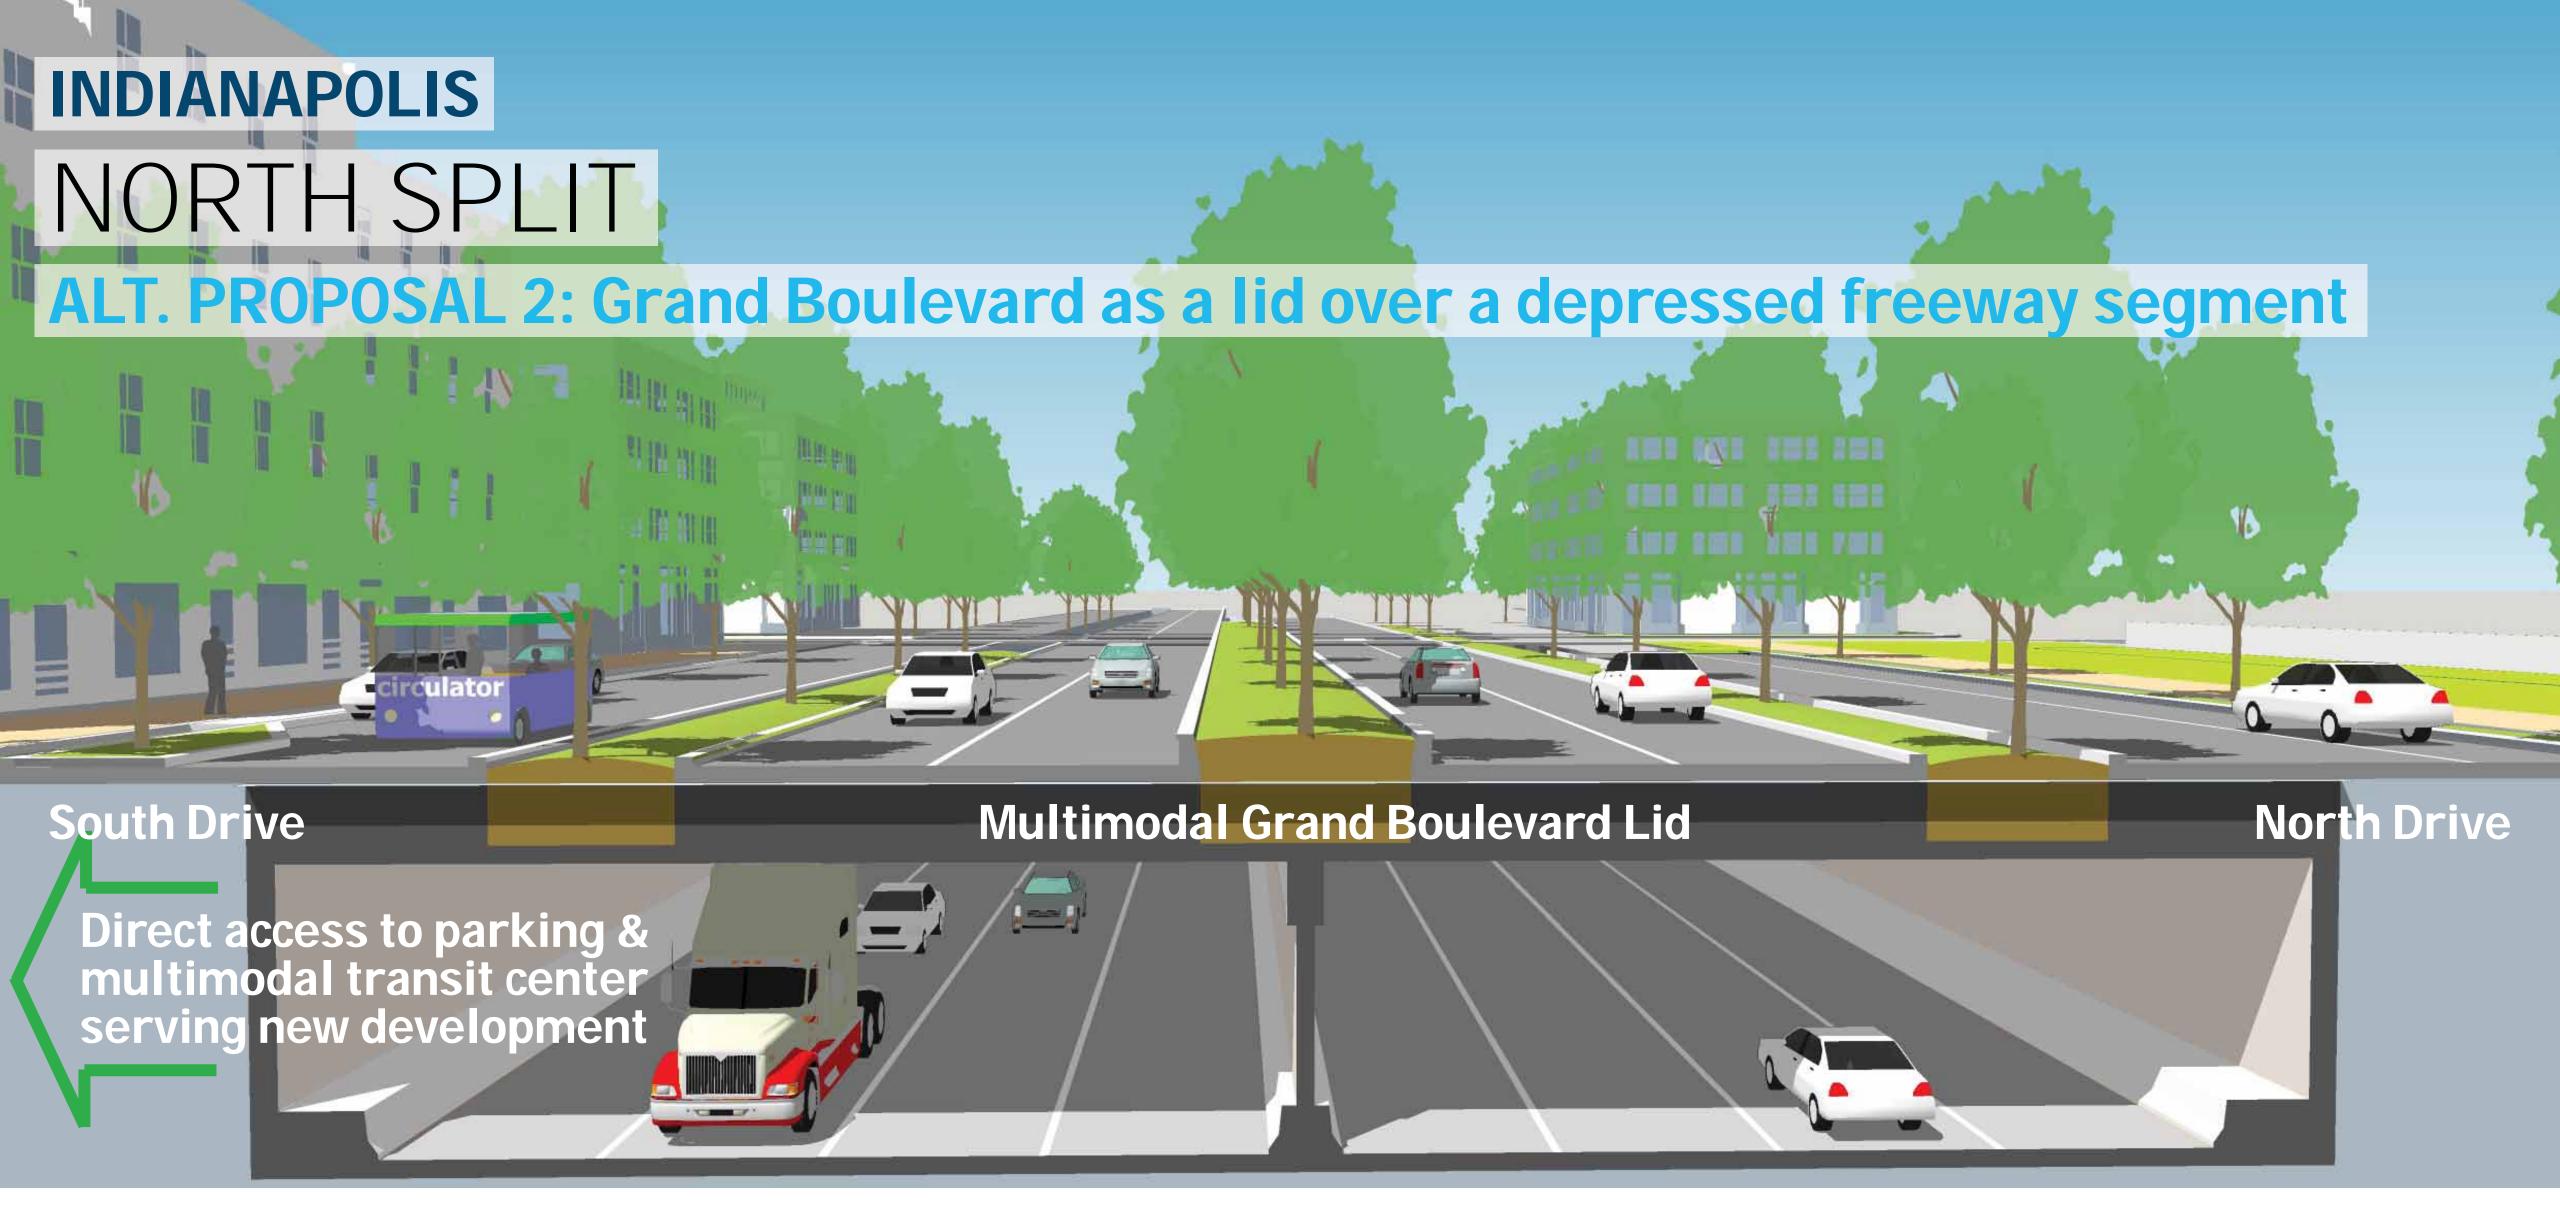

South Drive: traffic-calmed local access with on-street parking serving mixed-use development

Grand Boulevard as a landscaped multimodal cross-town connector

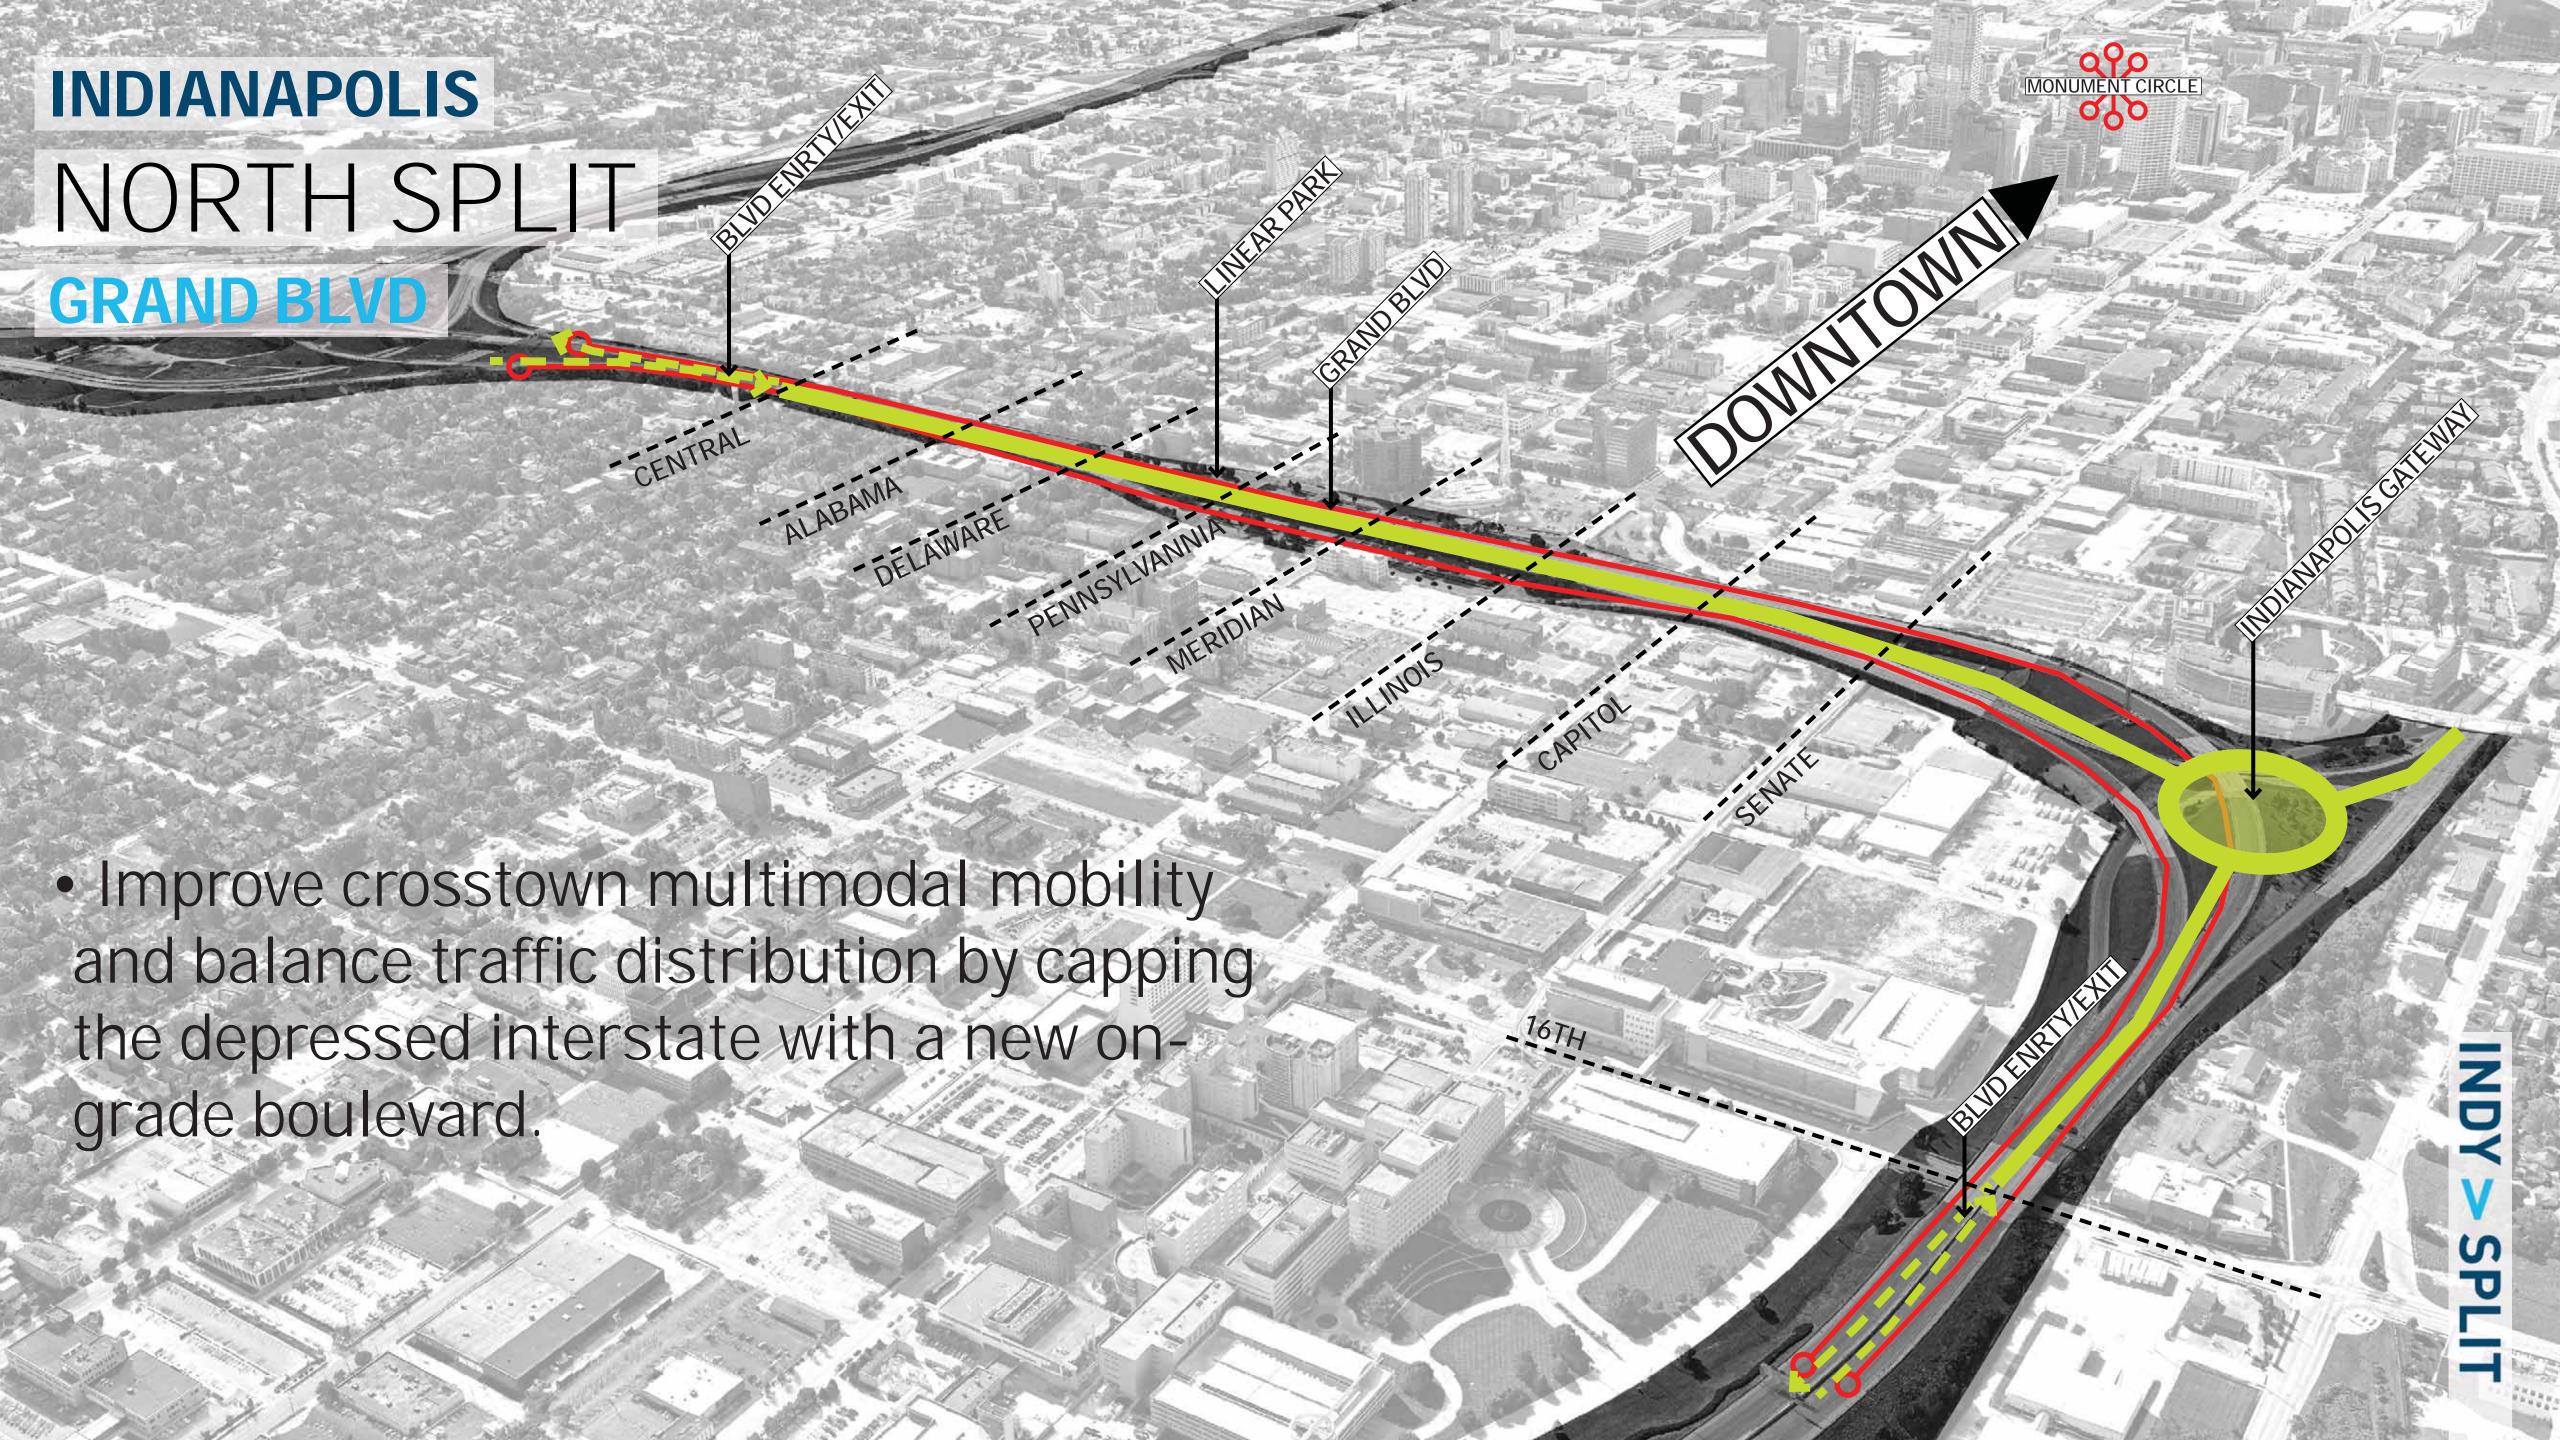

North Drive: traffic-calmed local access, neighborhood buffer and Monon-White River greenway

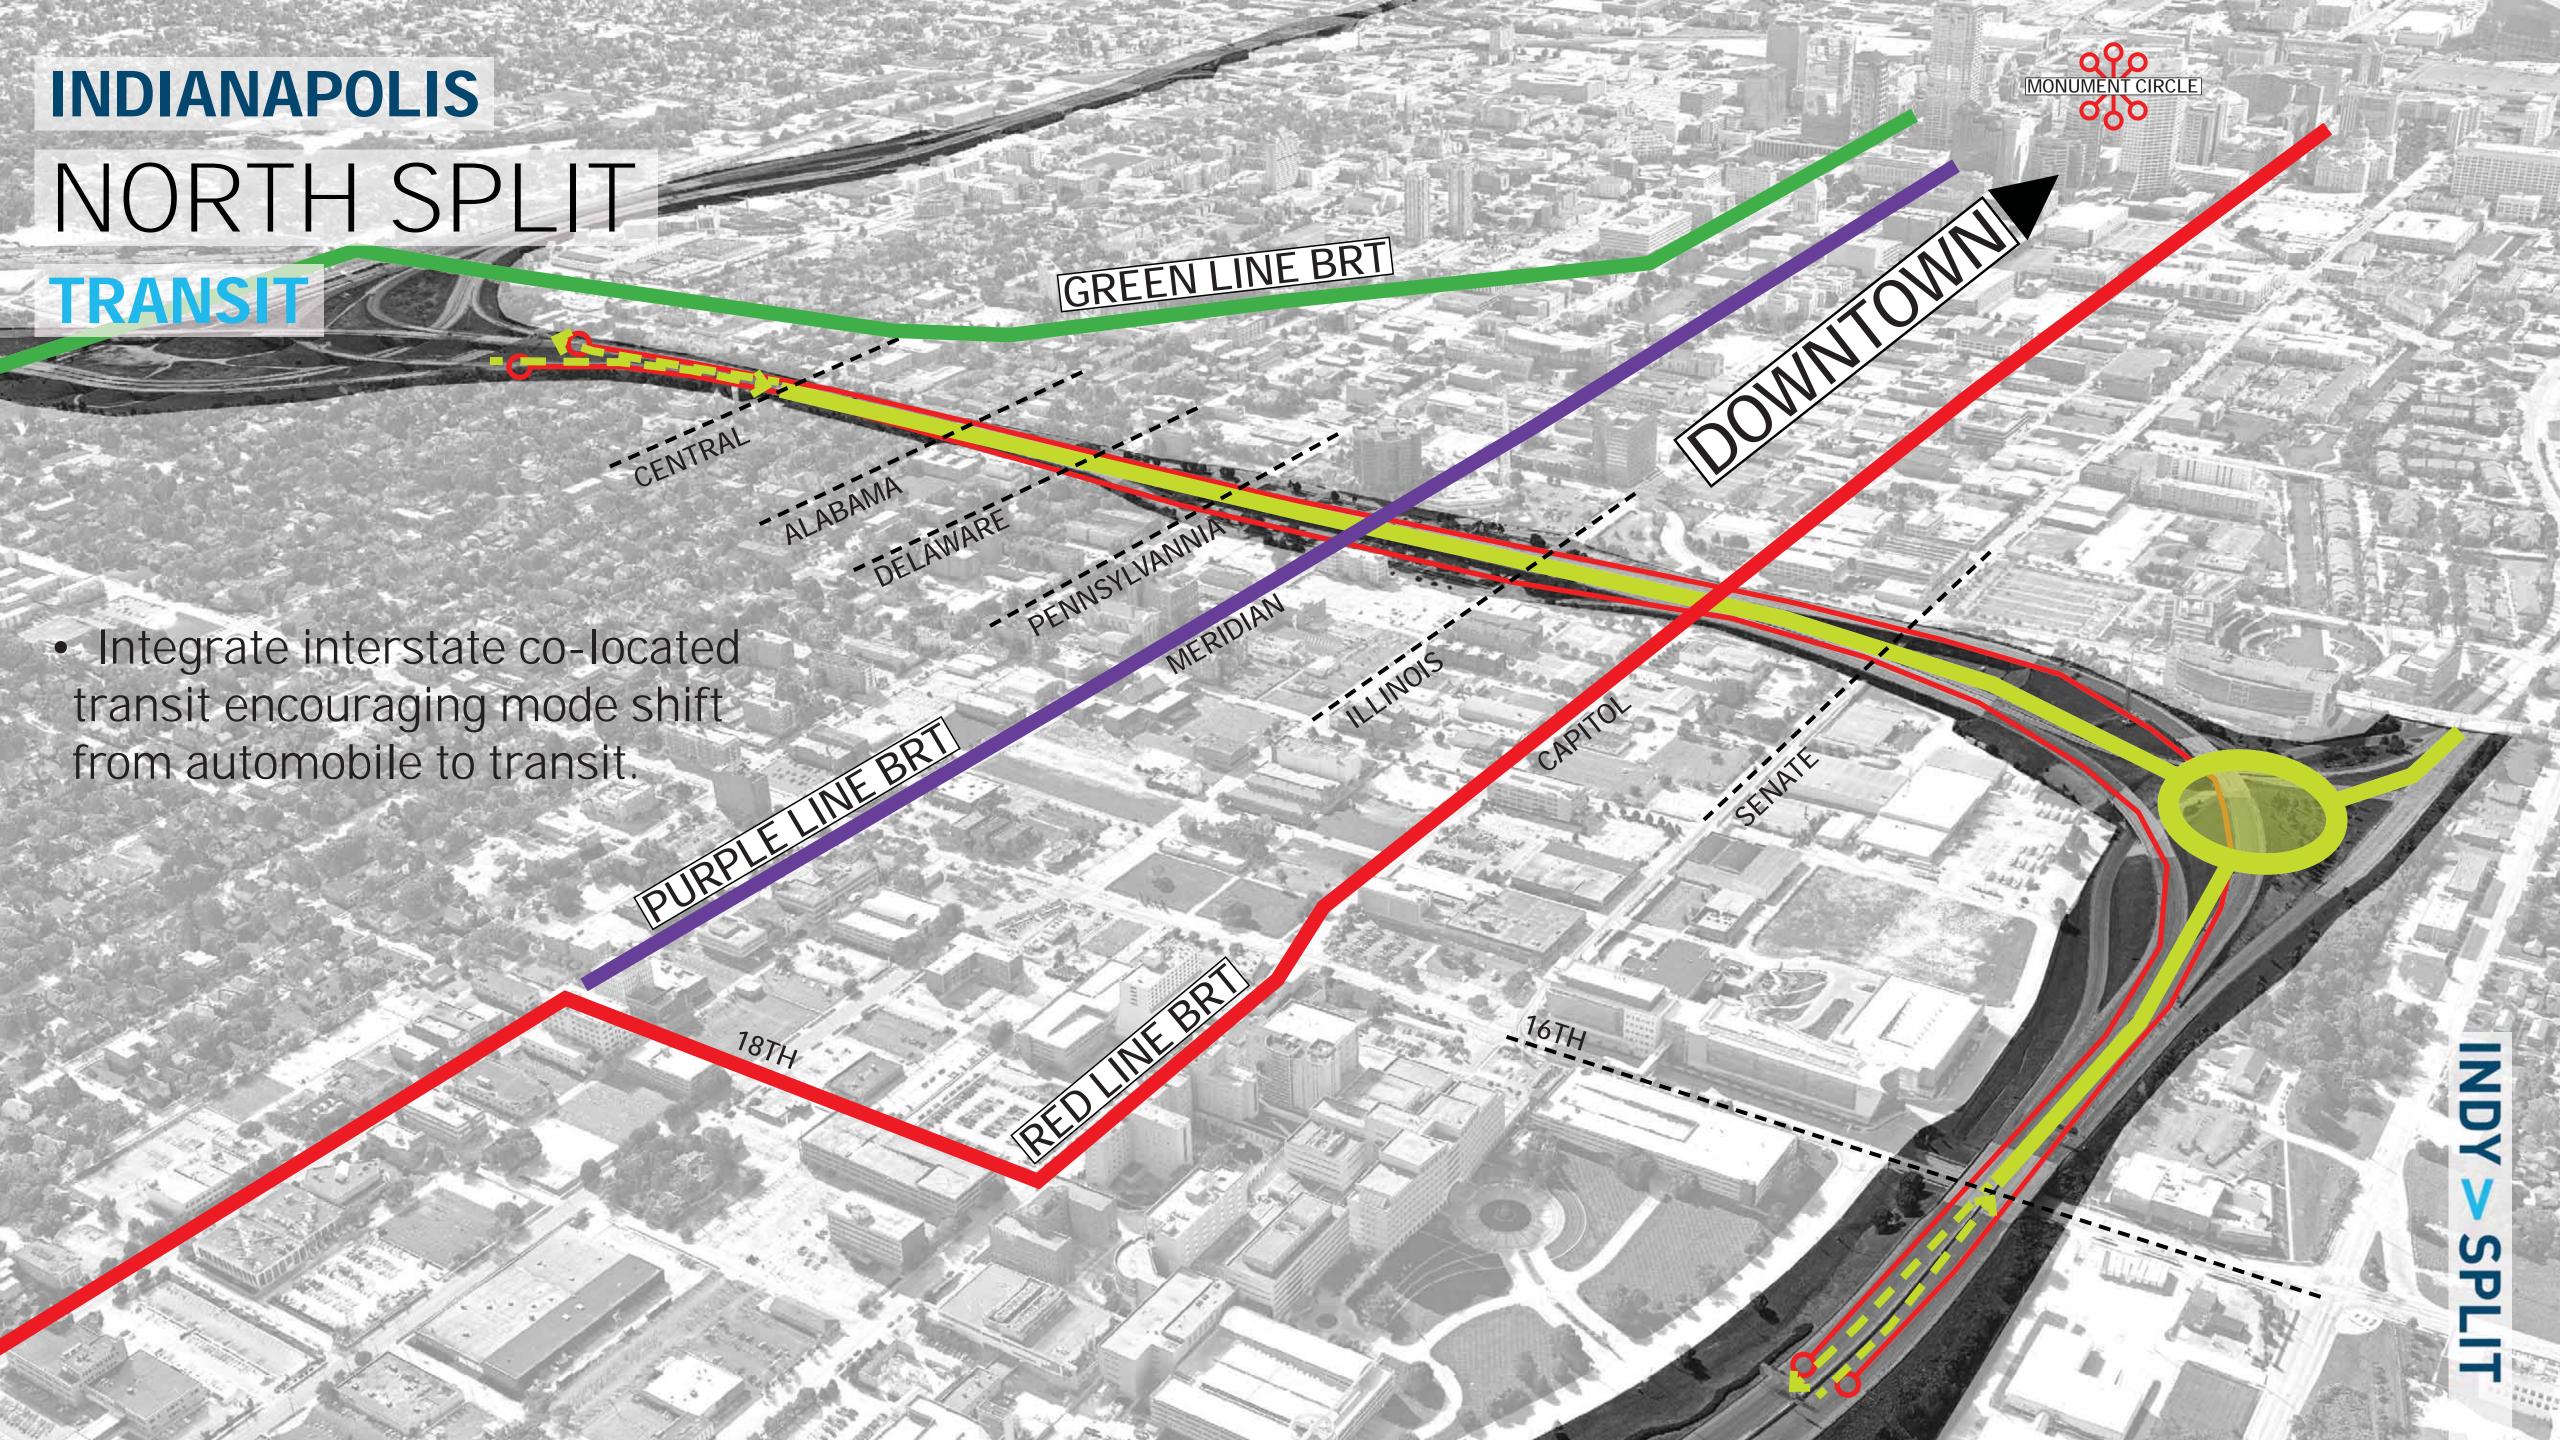

- Relinquish excess on-grade R/W to the city to create a multimodal boulevard & related development
- Gain approximately 10 acres of prime real estate for new mixed-use development for leveraged funding of affordable housing and high quality enhancements
- Restore the original grid's walkability and crosstown connectivity, its neighborhood connections to downtown, and balance thru and destination traffic
- Incentivize thru-traffic to use the outer loop with smart logistics/truck-only lanes and equitable tolling

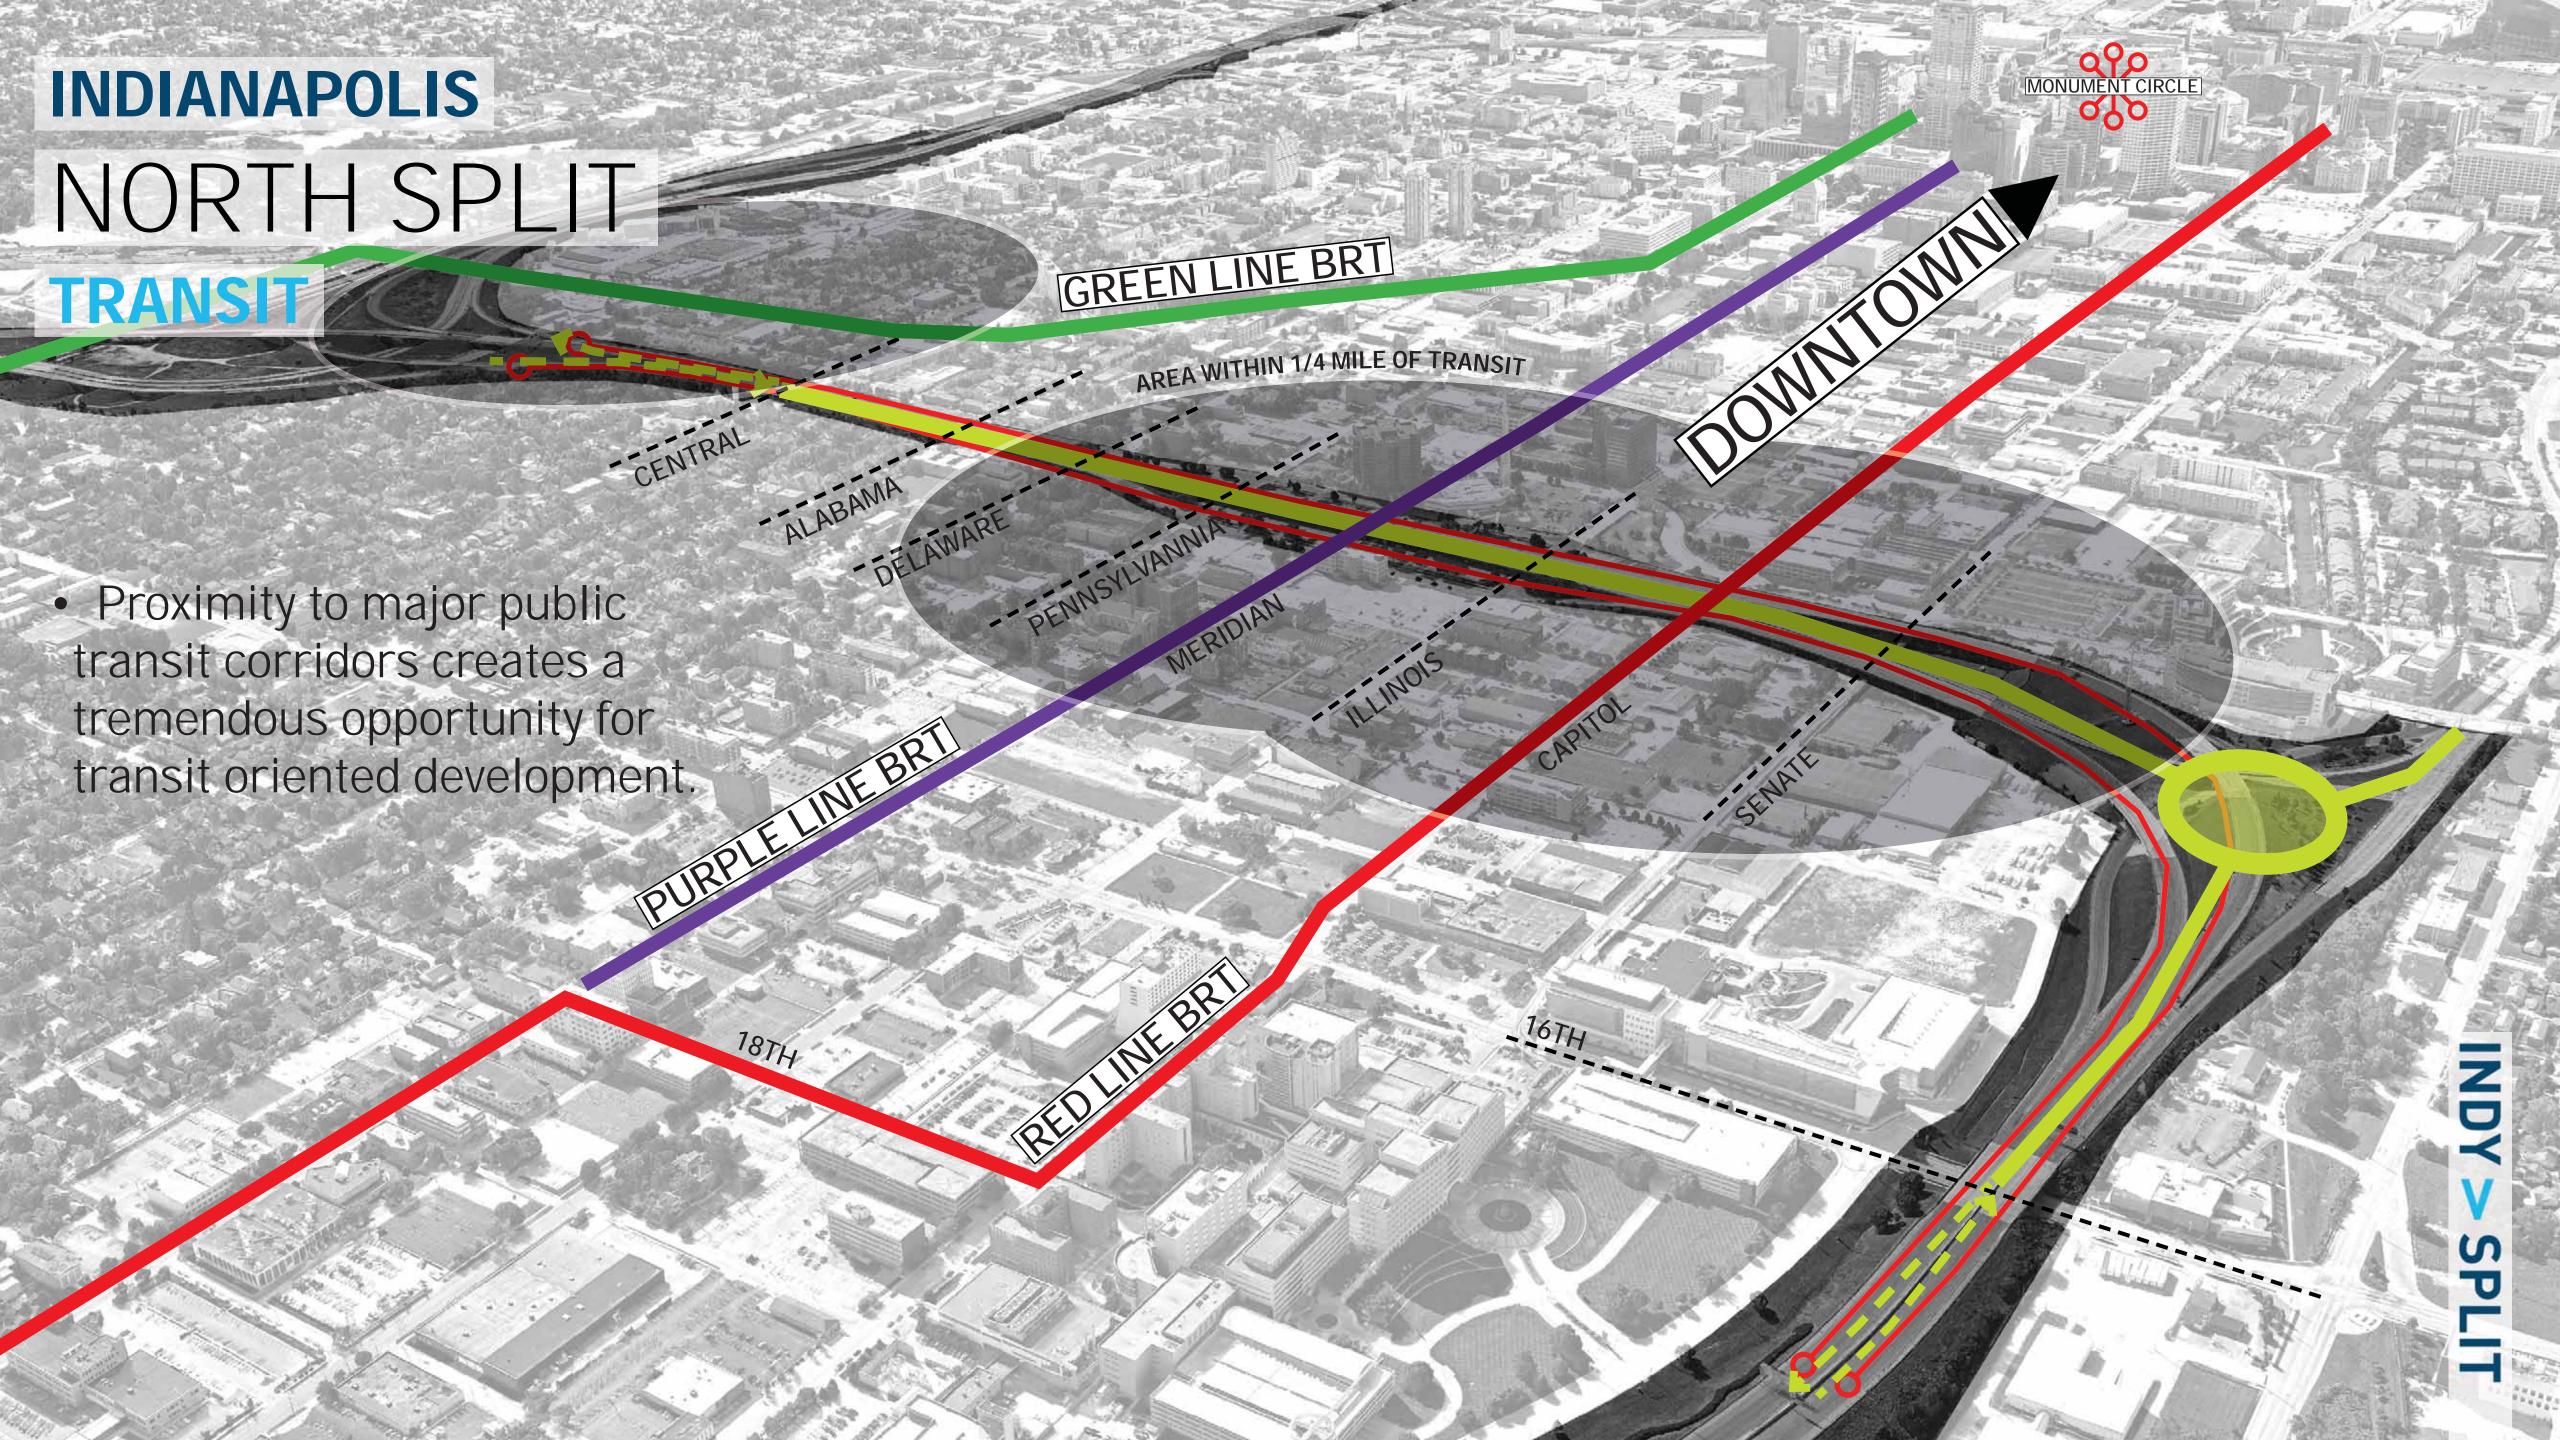

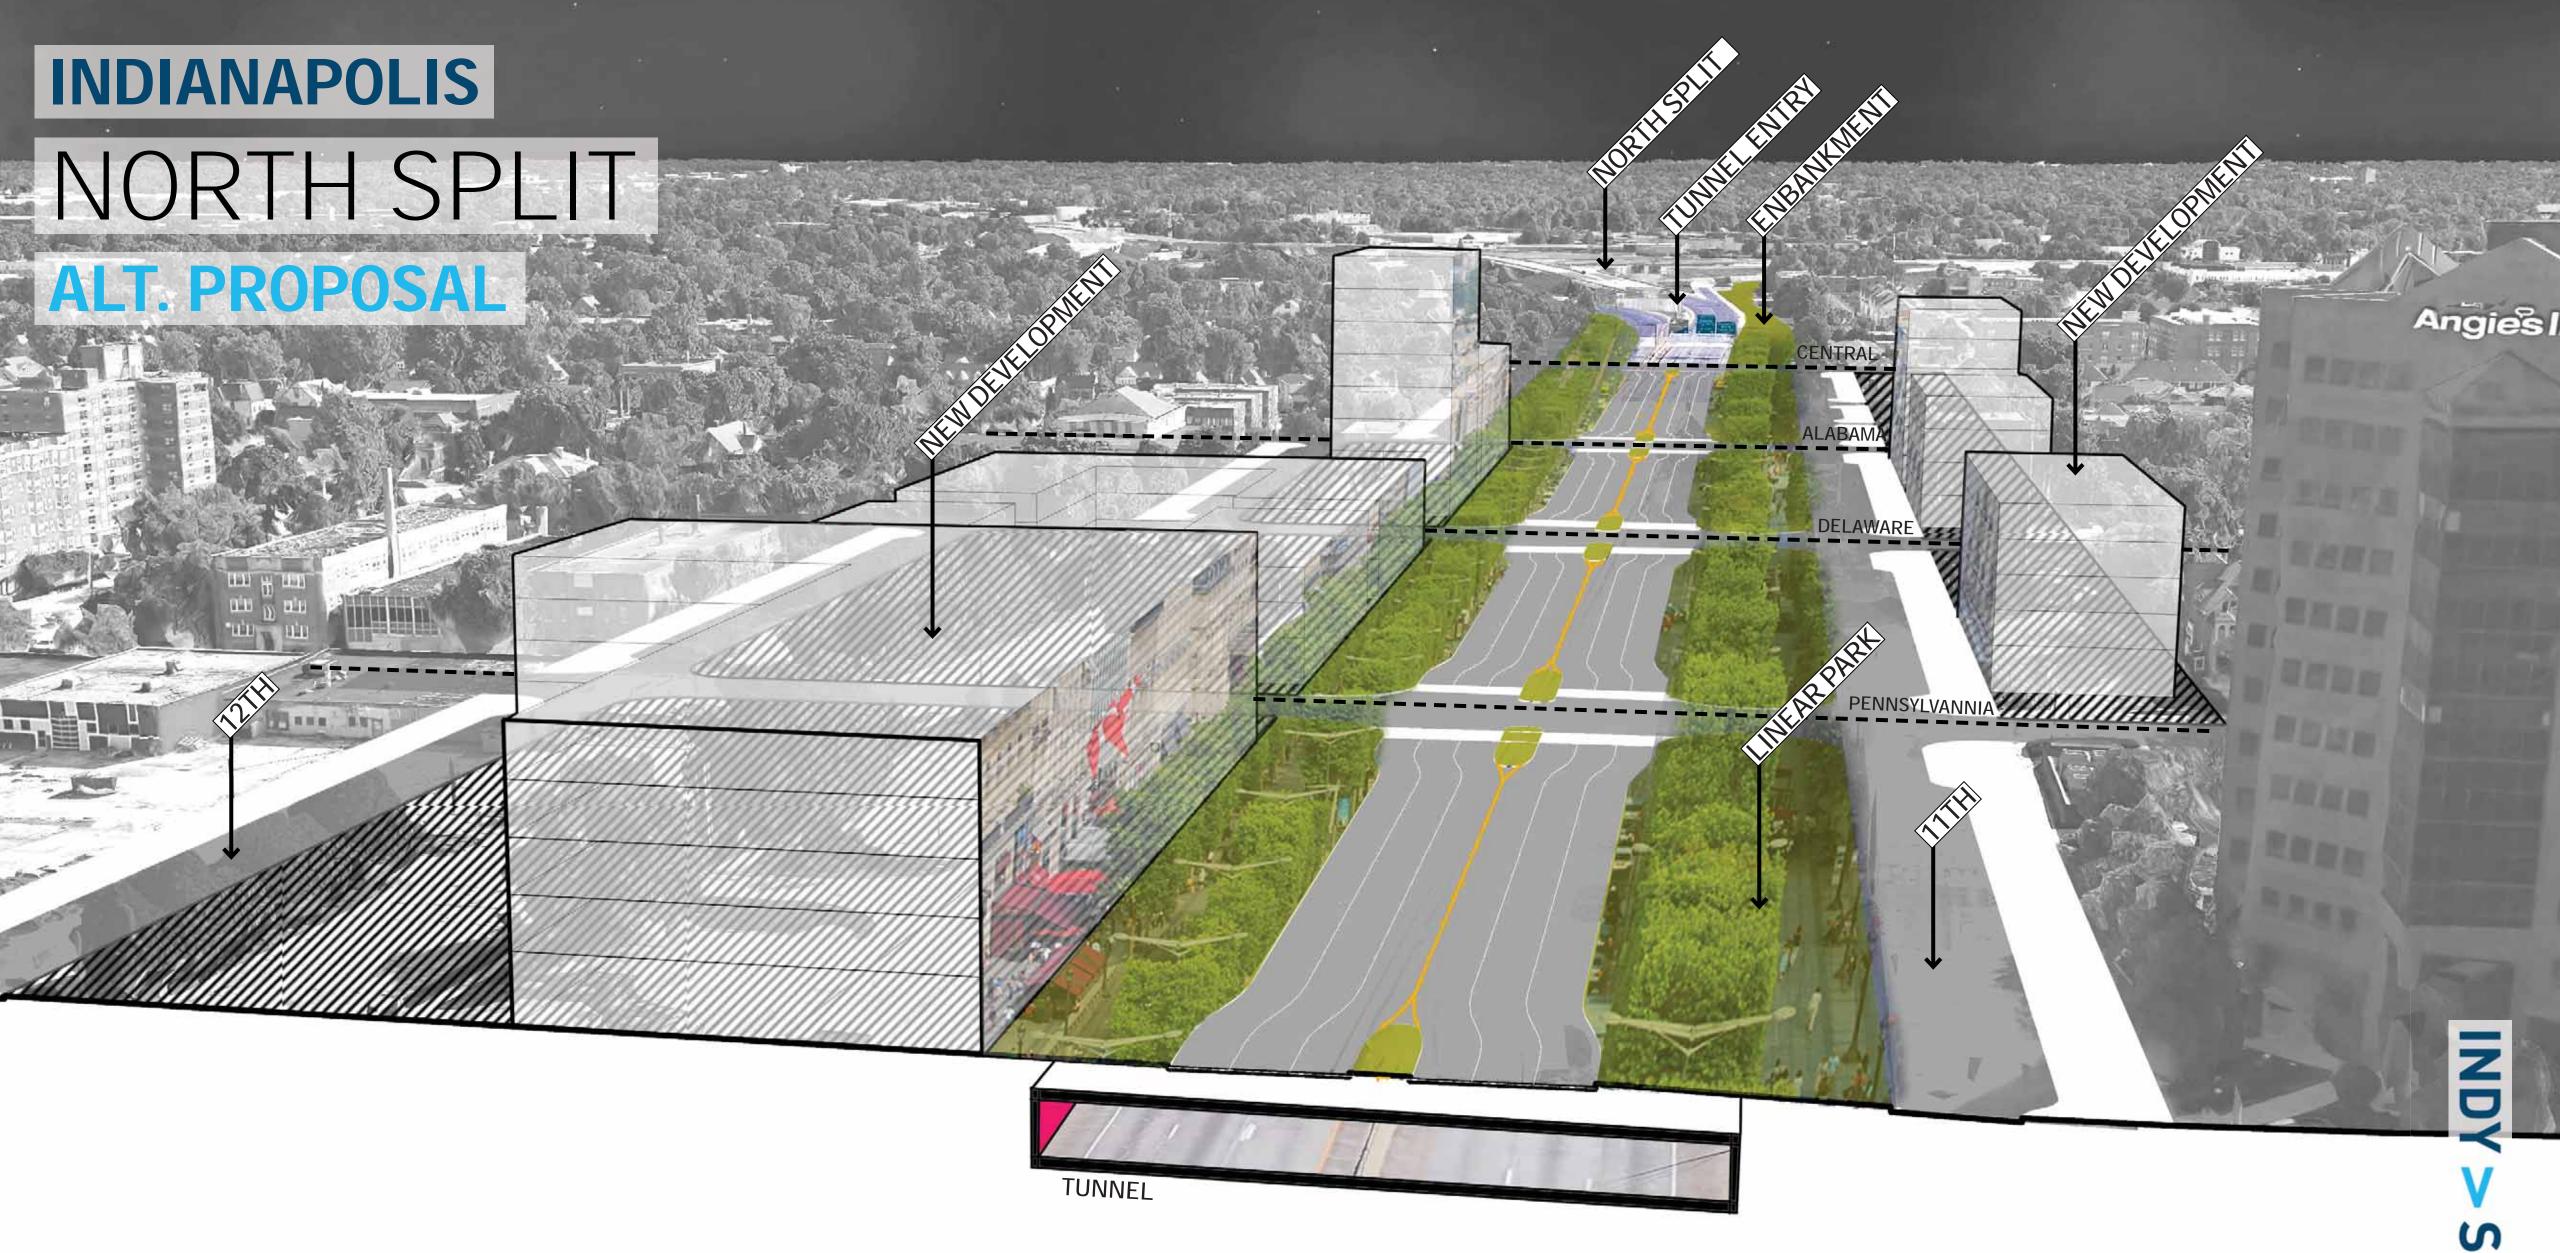

- Develop regional/local transit hub(s) to capture and distribute disruptive commuter surges
- Balance downtown destination logistics traffic while diverting thru-traffic demand to outer loop[

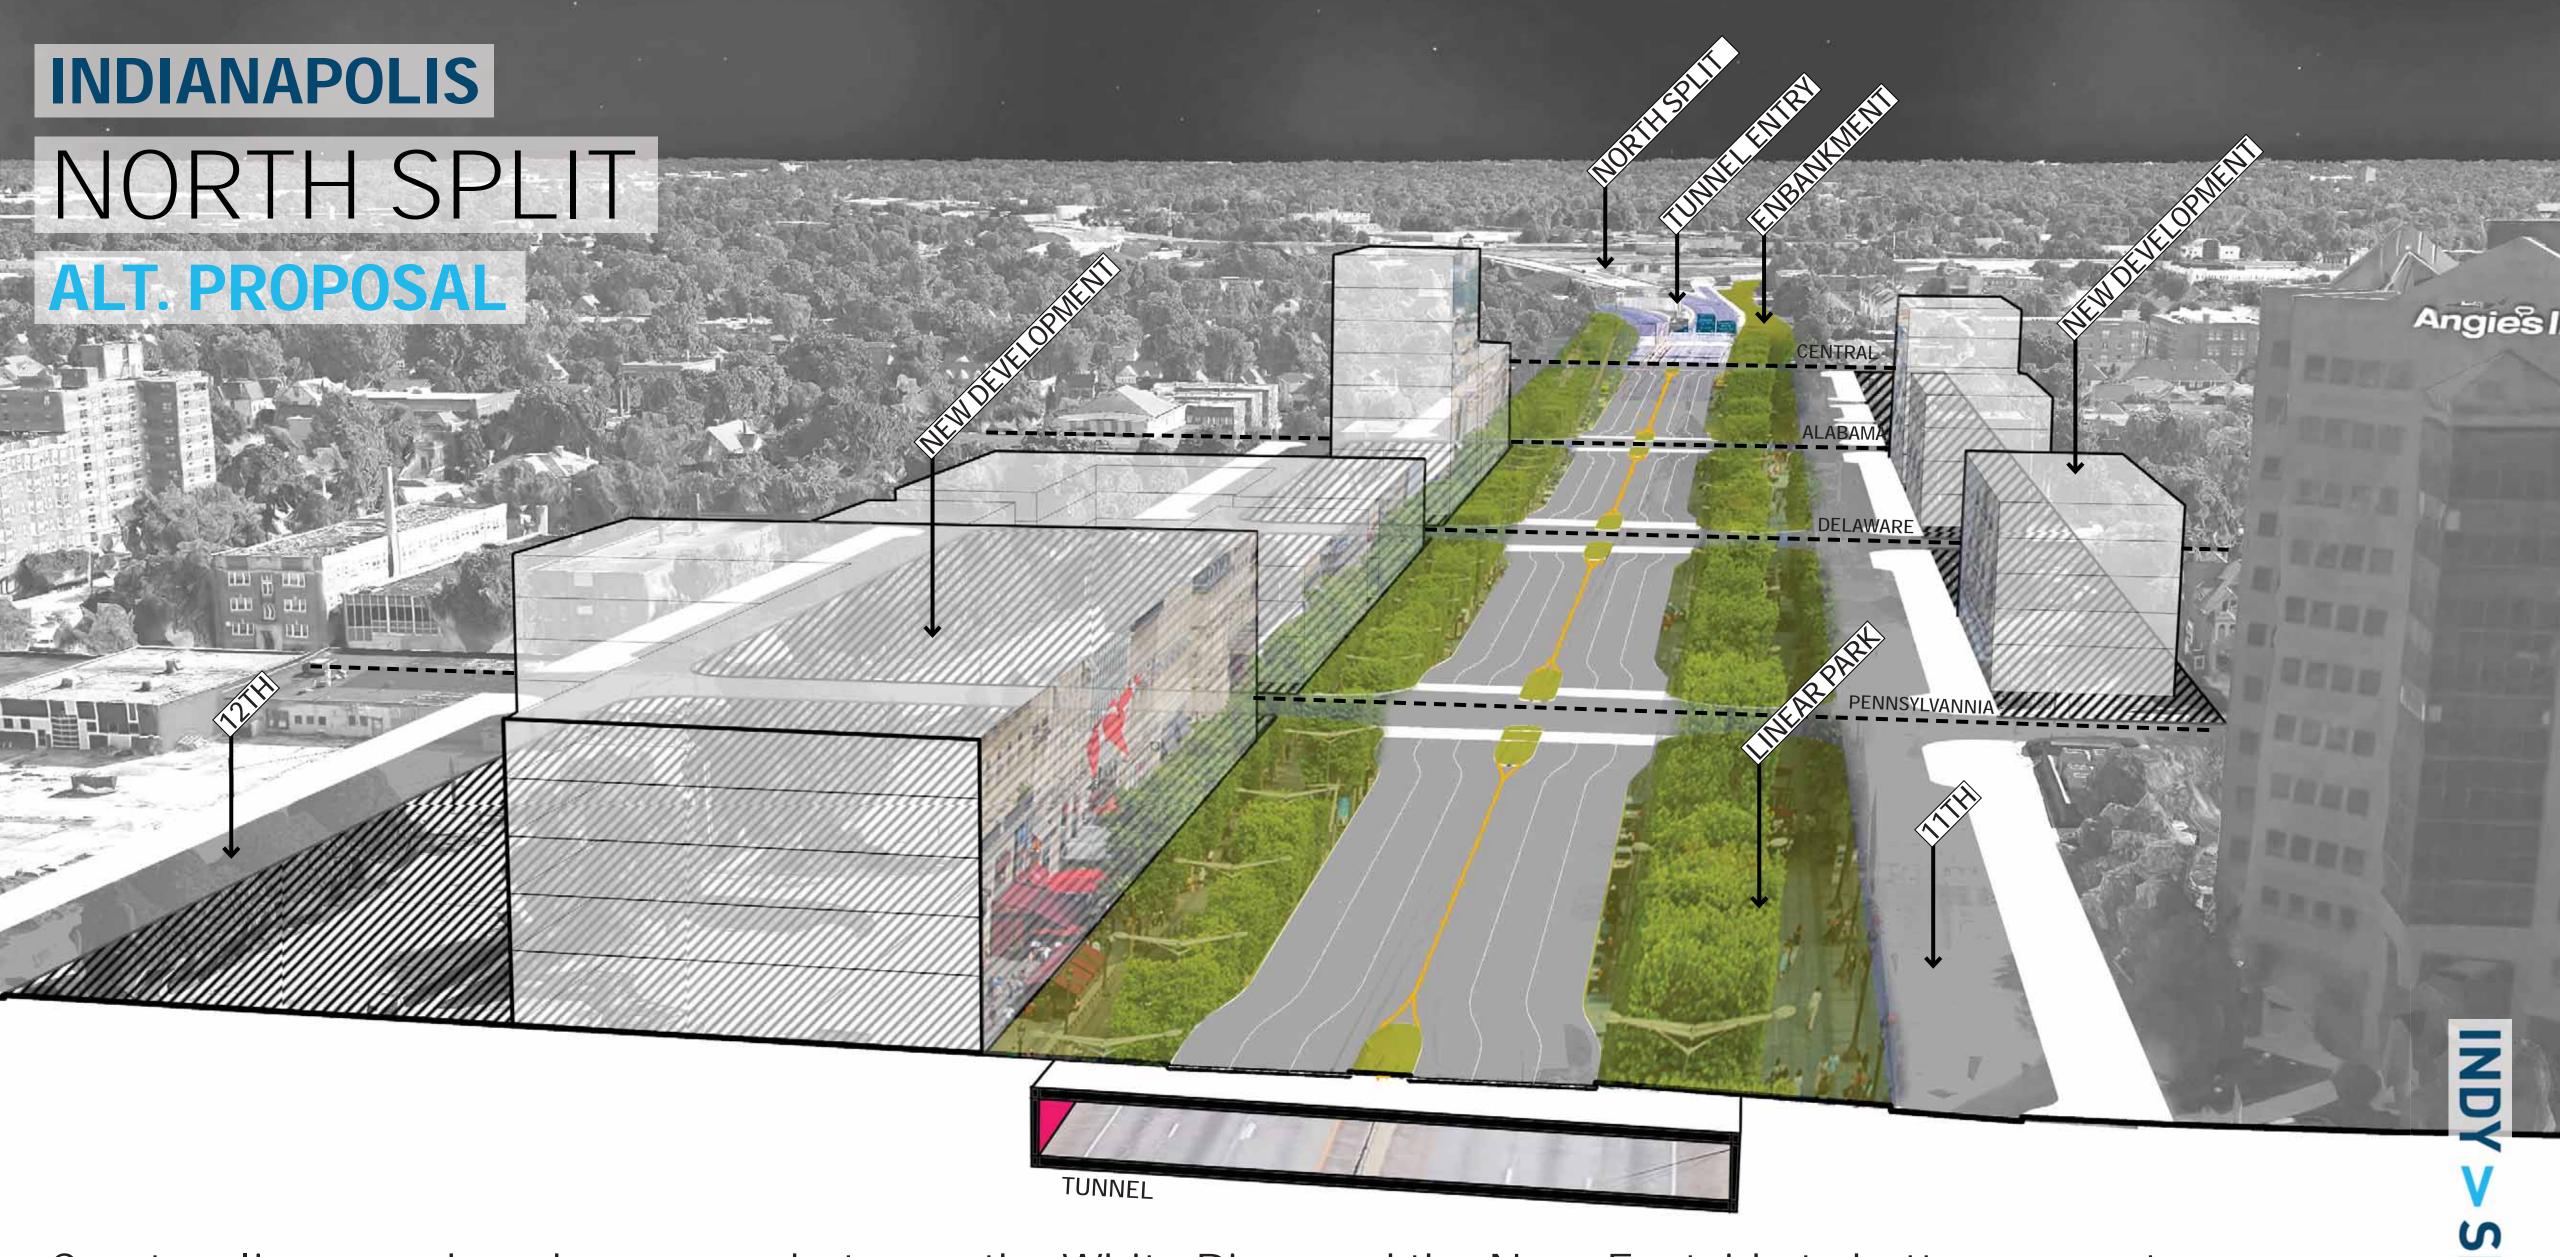

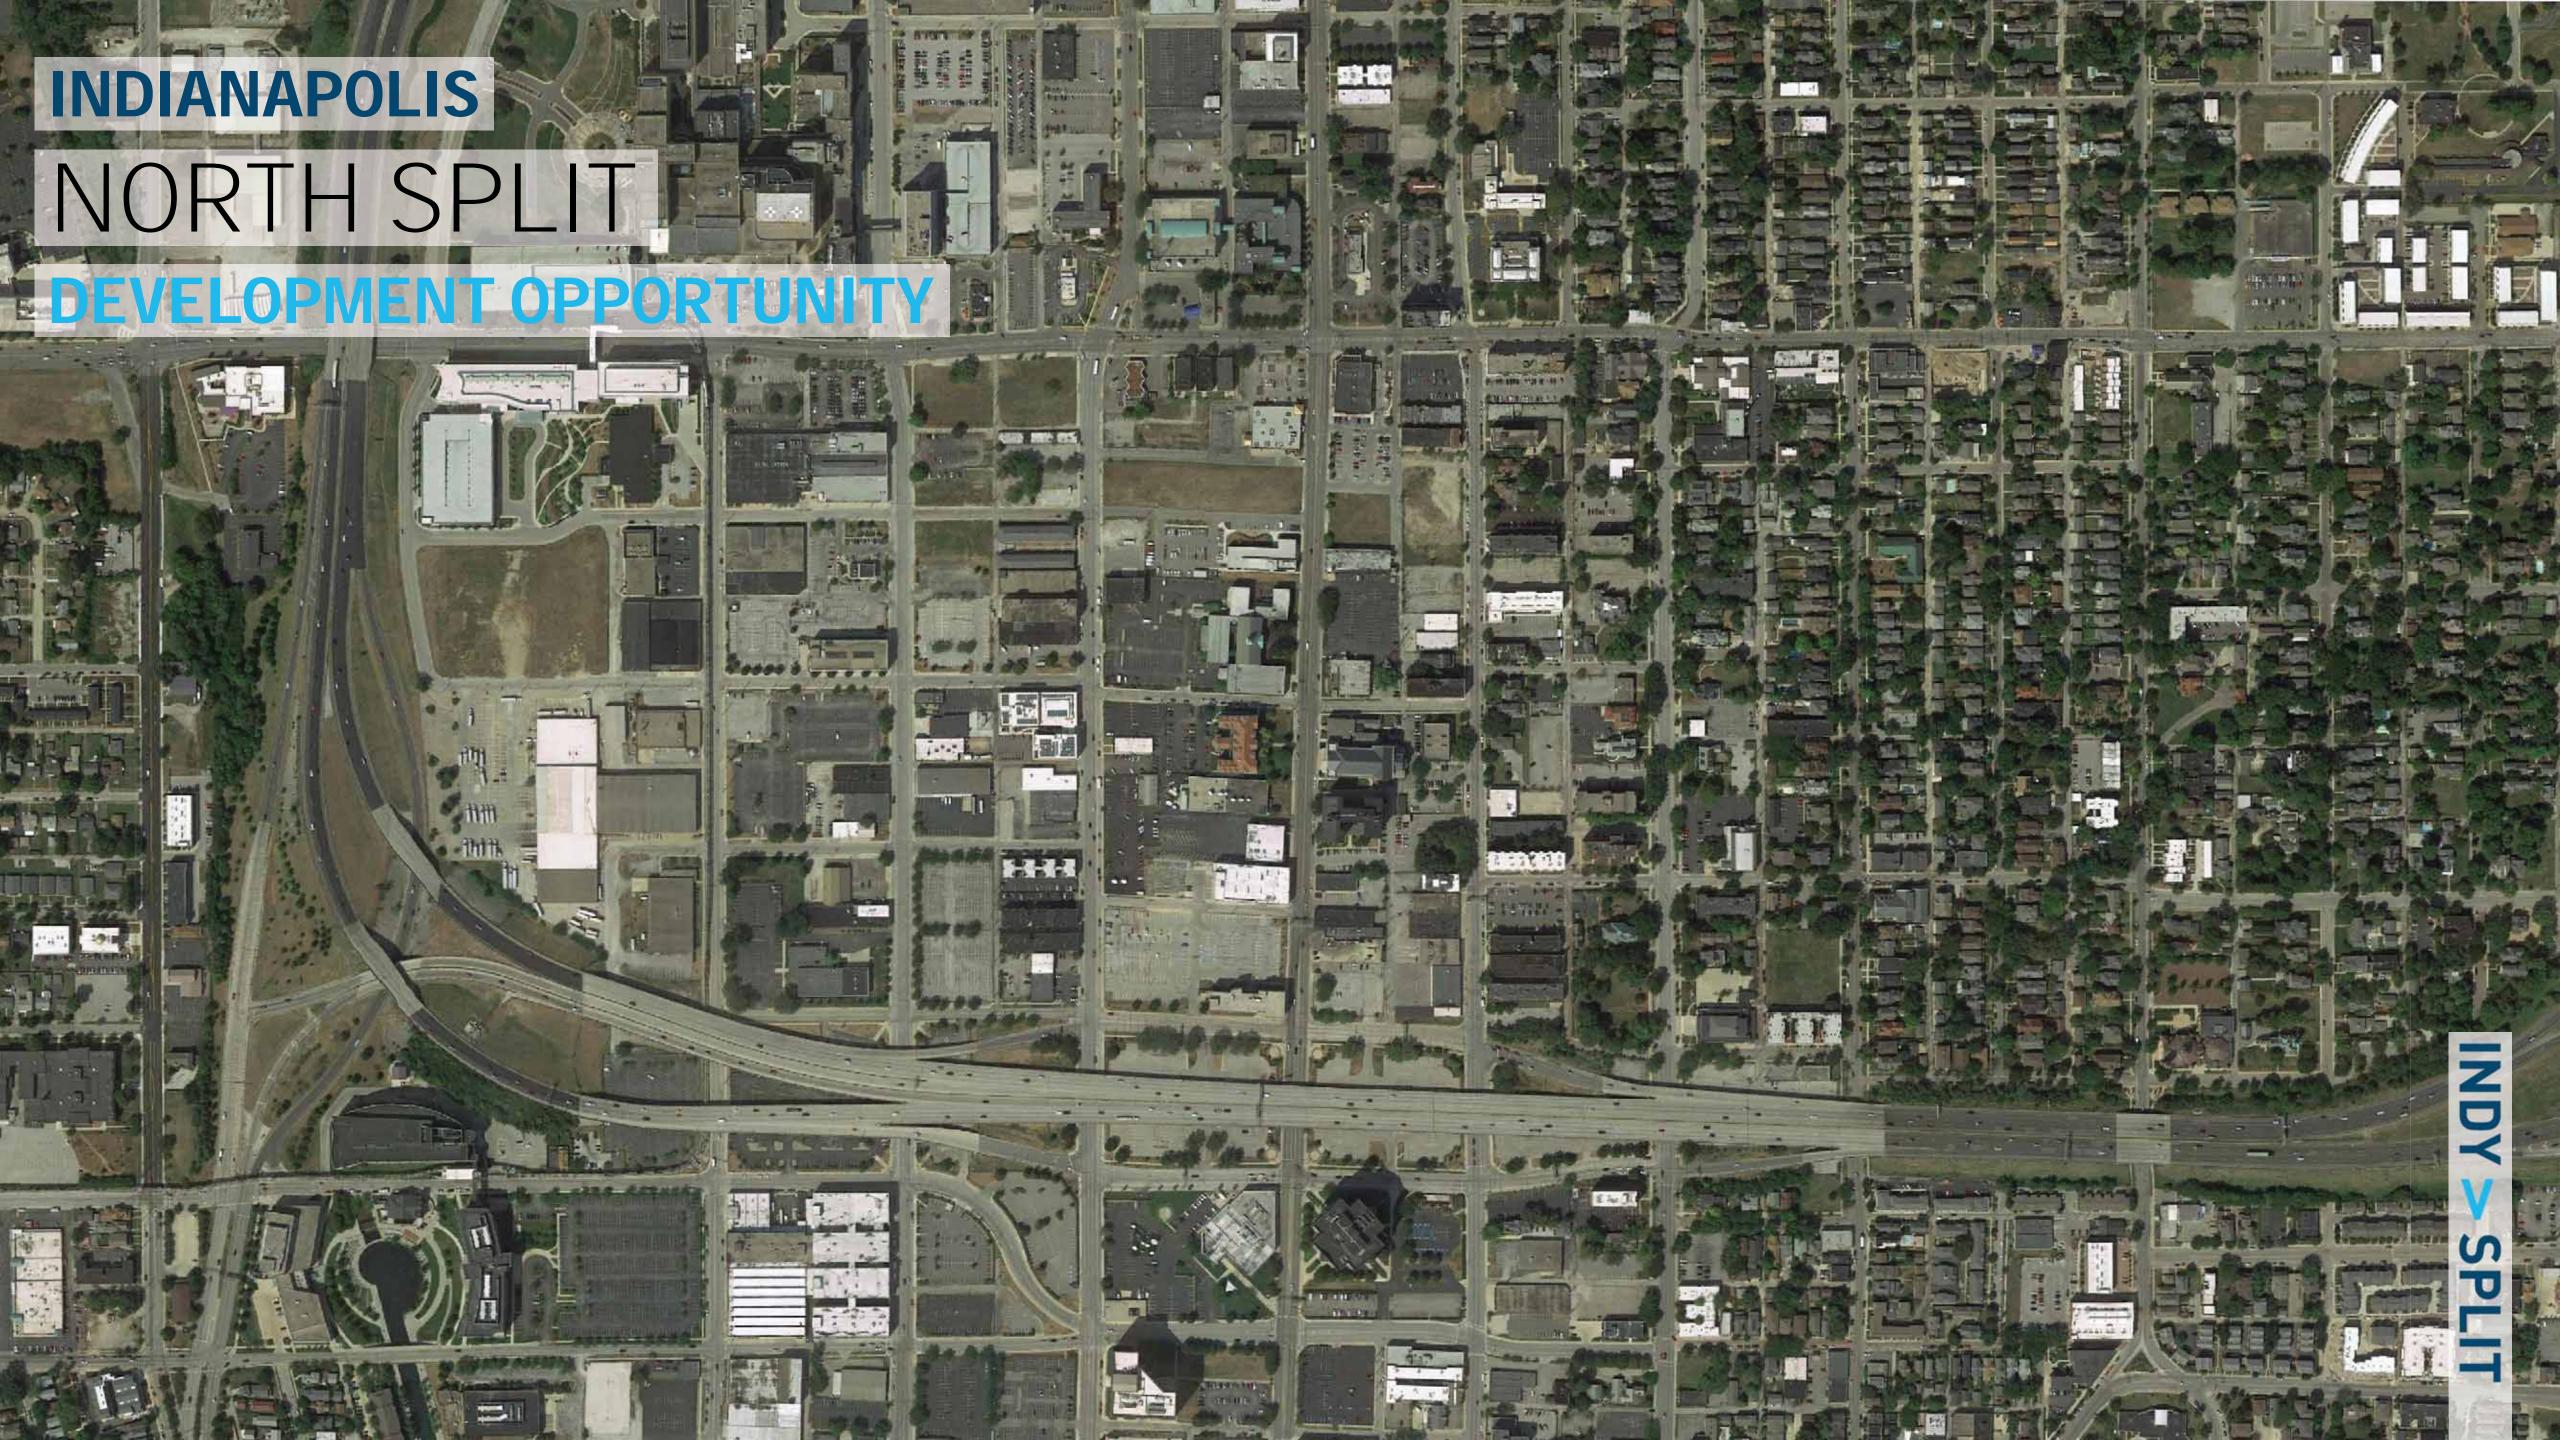

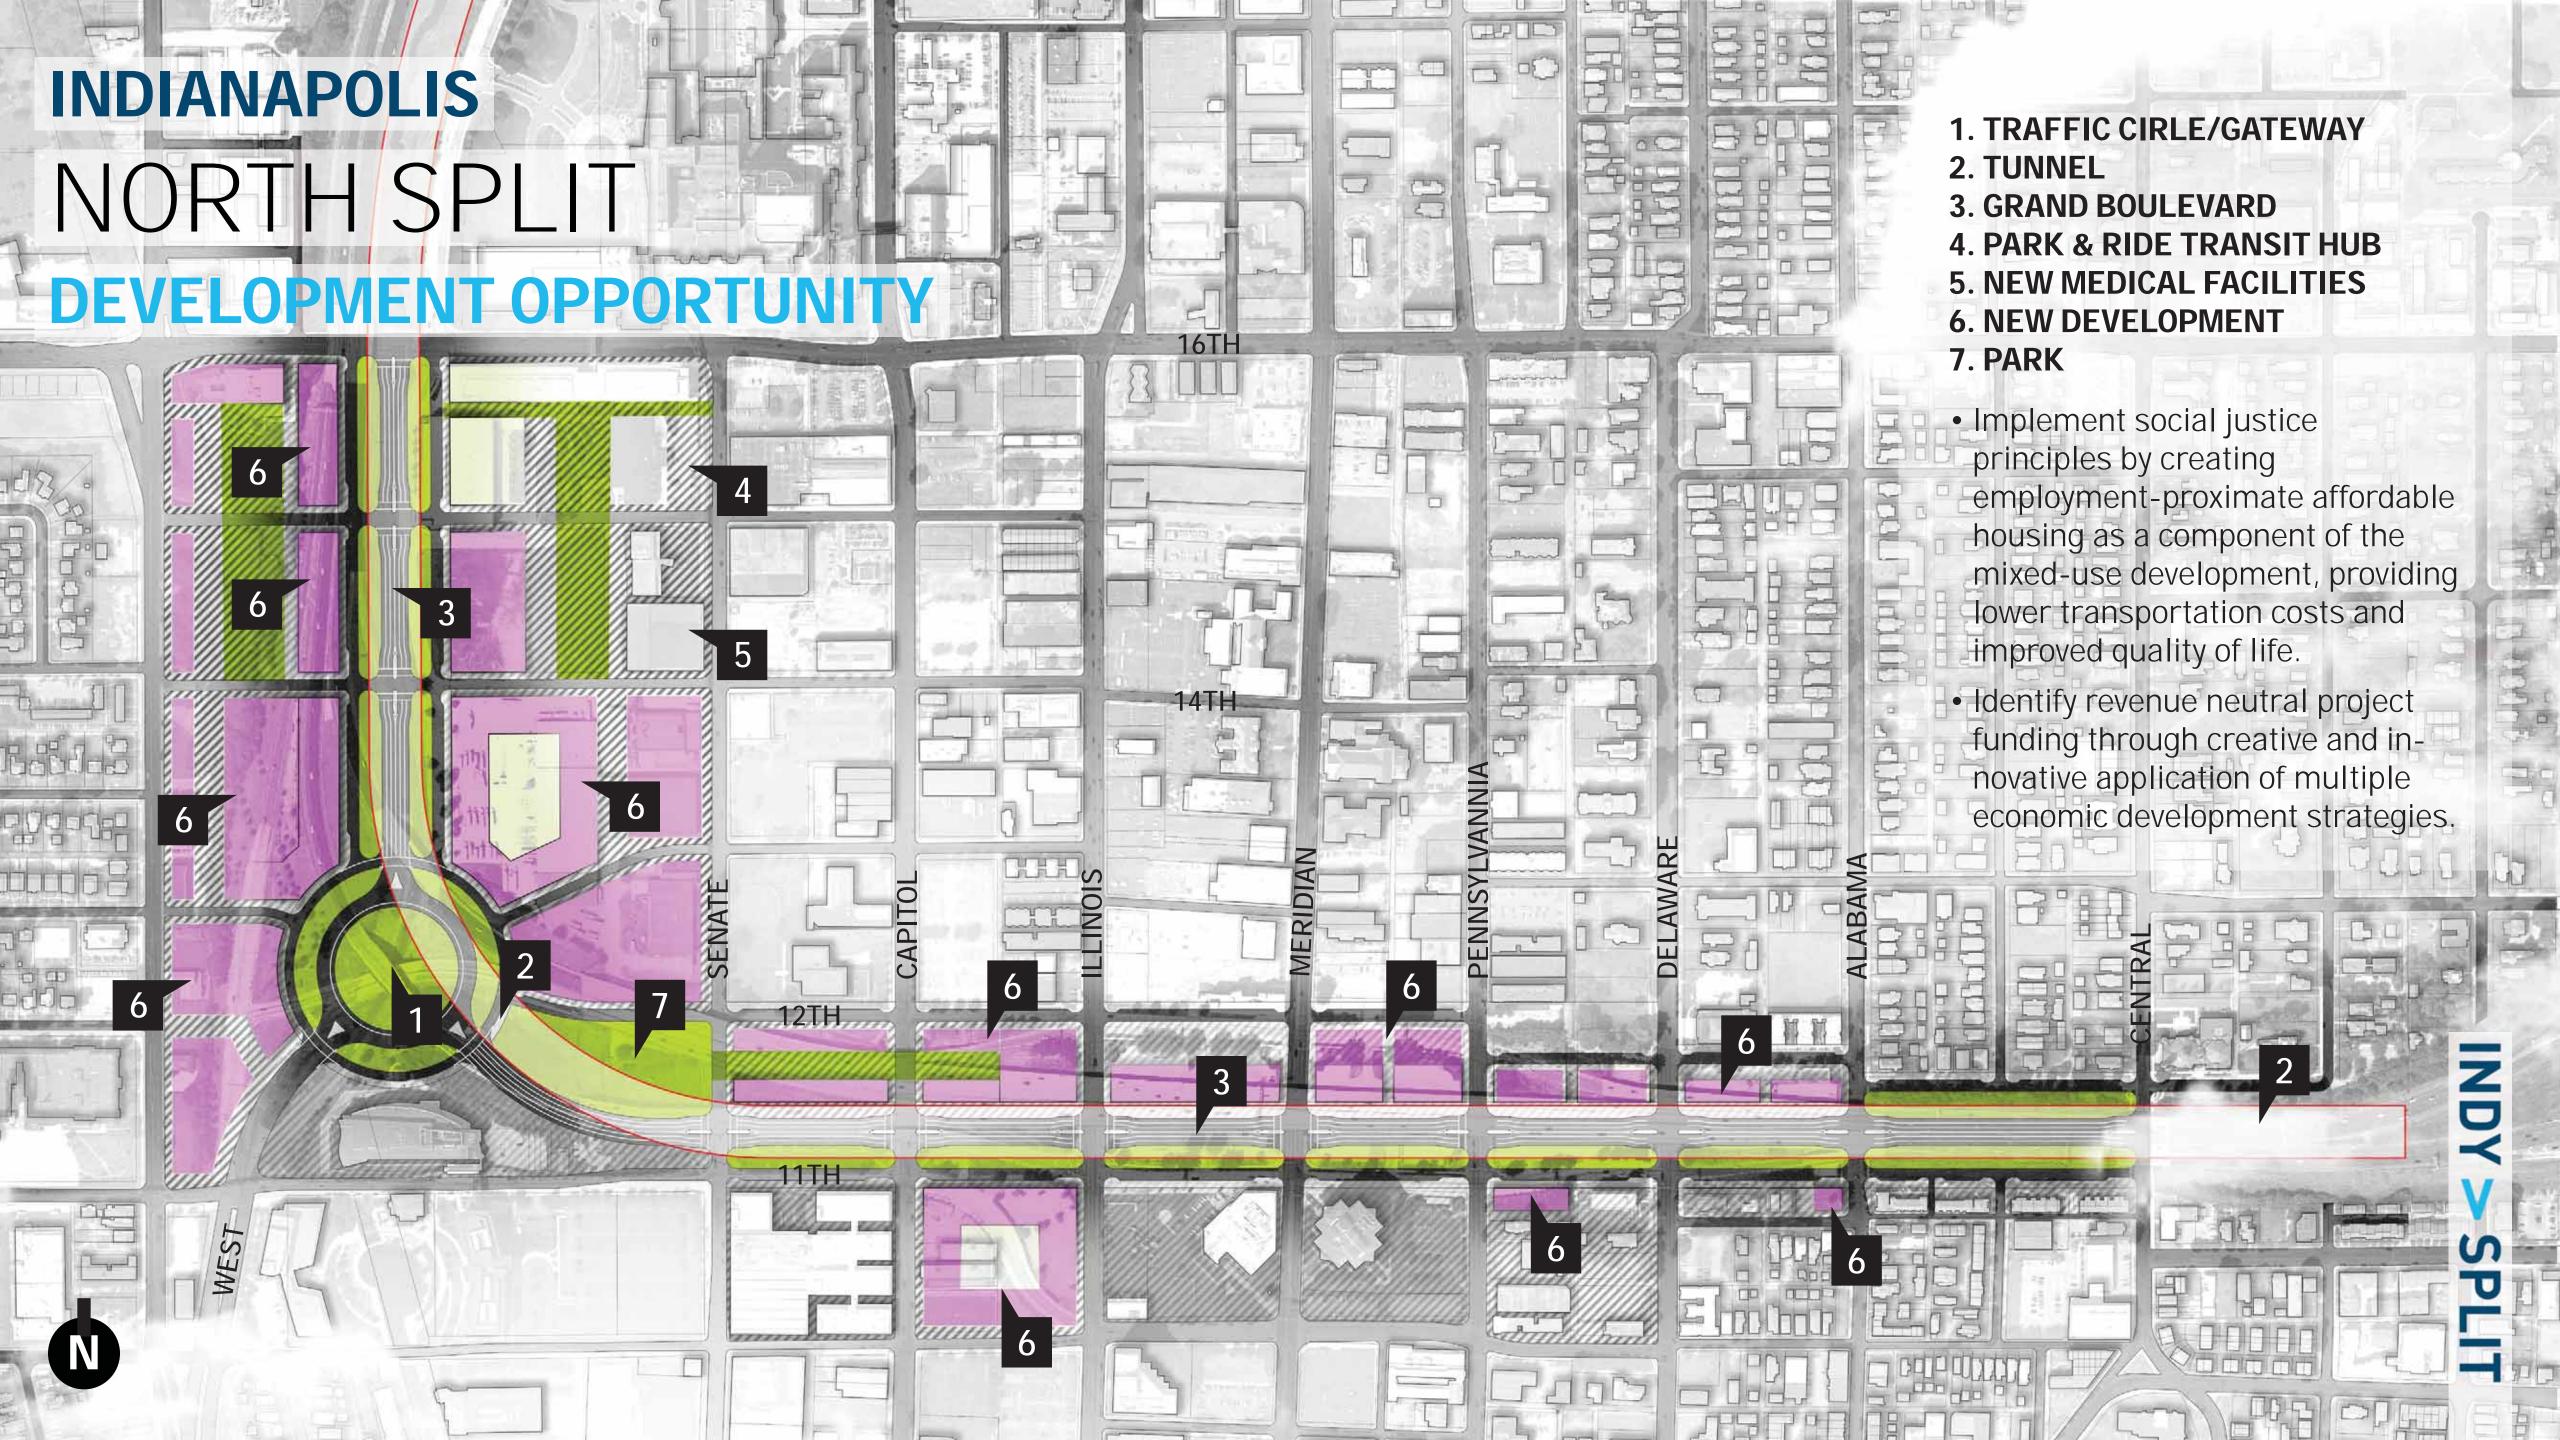

Reallocate the approximate 10-acres of right-of-way now occupied by the elevated interstate to create 2.5 million square feet of transit-oriented mixed-use development and significant additional tax revenue.

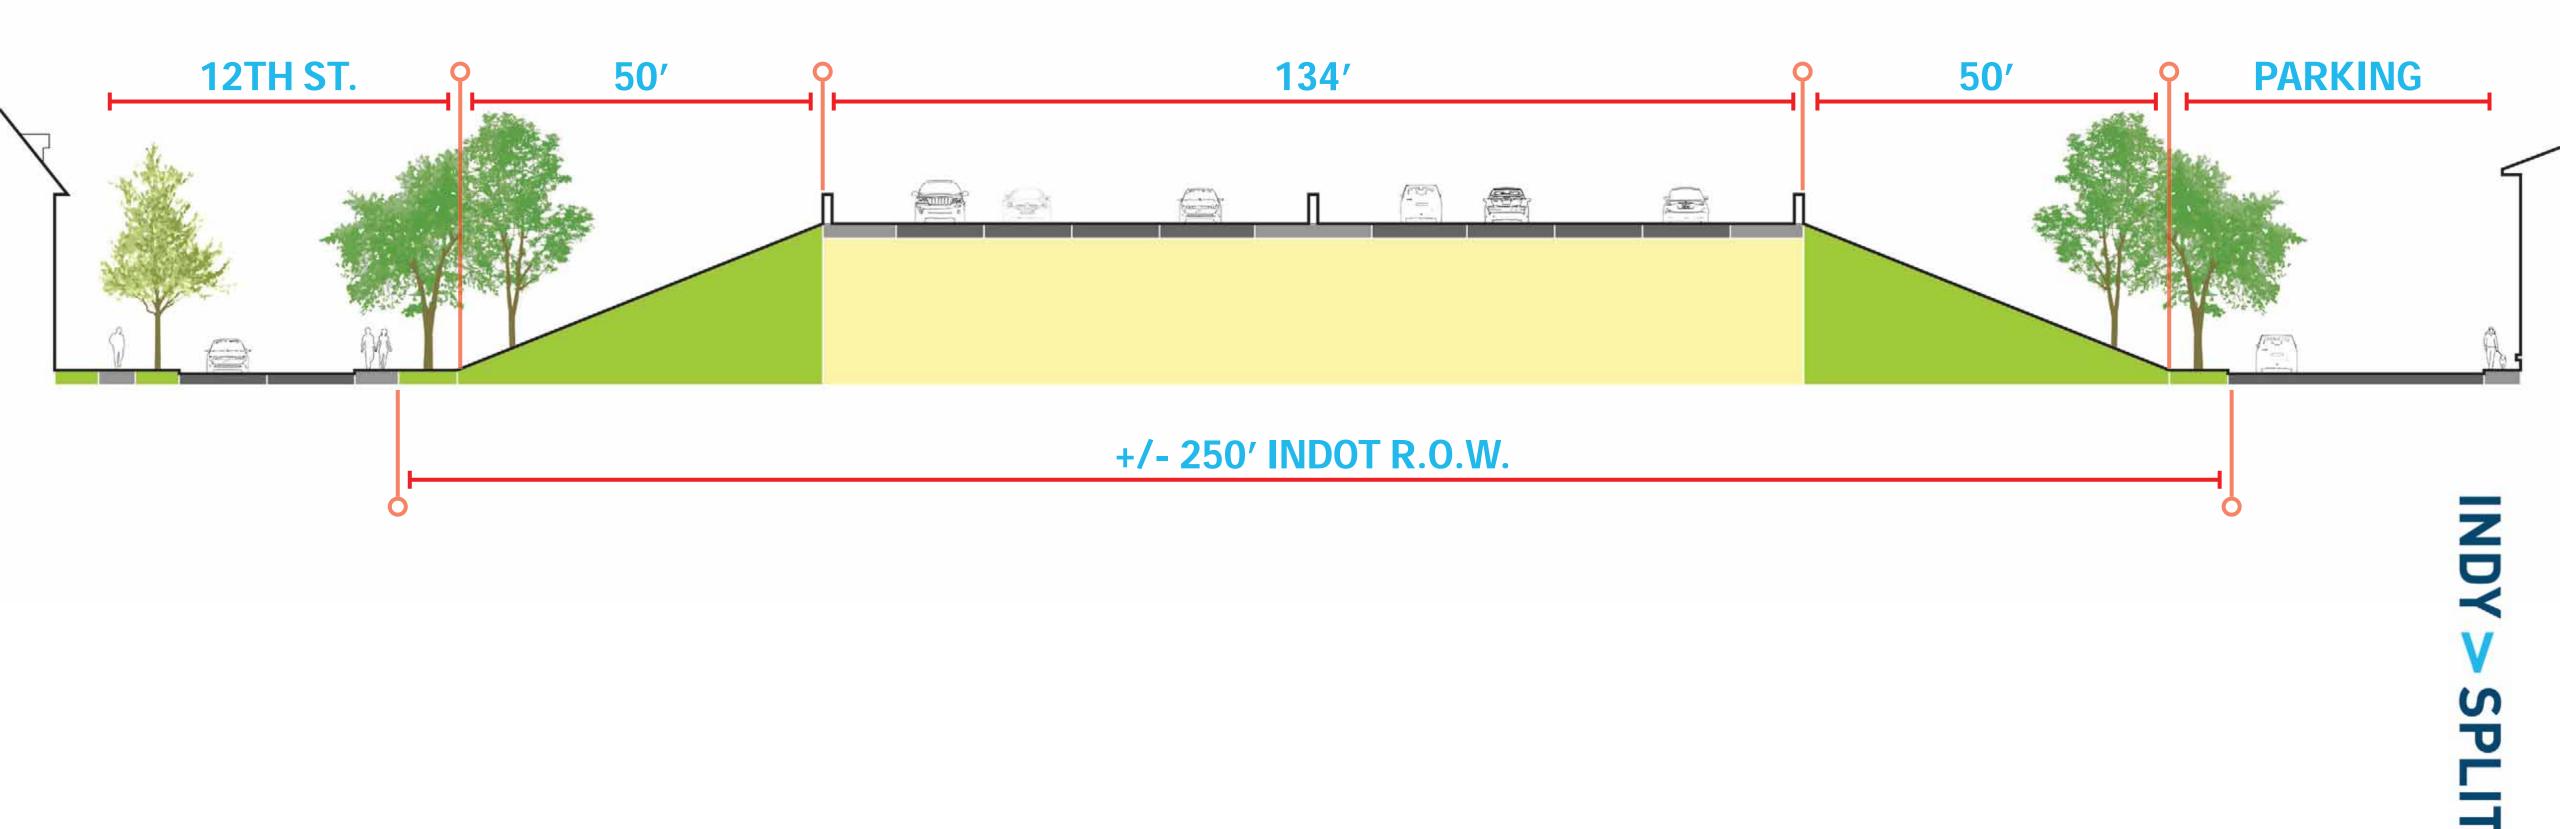

Create a linear park and greenway between the White River and the Near Eastside to better connect downtown with its adjoining neighborhoods.
